Thank you for Choosing MAXTOR

MAXTOR mission is to provide "design & quality that you can count on" bathroom products. MAXTOR's advantages to you: first-class bathroom products, fashion & enduring design, sustainable production and excellent service. MAXTOR's team will stick to our original intention, do a good job in every product, and serve every one of our customers wholeheartedly.

Installation Considerations

- MAXTOR recommends the faucet be installed by a licensed, professional plumber.
- Make sure read over the instructions thoroughly before installation, and you have all tools and supplies needed to complete the installation.
- Be sure to thoroughly flush the supply pipes of dirt and debris.
- Turn off the water supply before commencing work at the stop valve.
- This is the single hole basin faucet, not include deck plate, the deck plate should be bought separately if install the faucet for three holes basin.
- Drain or a pull rod not be included also.
- The hot and cold supply hoses included with this faucet are for use with $\frac{3}{4}$ stops. If your stops are a different size, purchase adapters at your local plumbing supply store or home center. Adapters are not available from MAXTOR.

Care & Cleaning

A damp cloth and mild liquid dishwashing soap may be used, followed by rinsing with water and drying with a soft cloth. Most common household cleaners (including mild abrasives for Brushed Chrome and Platinum) can be used, when used in accordance with the manufacturers' instructions for use. However, all cleaners should be rinsed off thoroughly with water immediately after cleaning your faucet. Avoid using any harsh cleansers (e.g., steel wool or harsh chemicals) or pads/sponges that are unsafe for polished metallic surfaces. Most green, fibrous pads/sponges contain microscopic mineral particles that can scratch a faucet's finish. Cleaner manufacturers may change their formulations at any time; therefore, MAXTOR does not recommend any specific cleaner.

MAXTOR suggests the periodic application of a quality non-abrasive wax, such as car wax or furniture wax, especially for matte or textured finishes (e.g., Brushed gold, brushed Nickel Chrome or Chrome).

Removing Dried Water Spots:

A 50/50 blend of household vinegar and water can also be used for a limited amount of time, followed by rinsing with water and drying with a soft cloth.

Tools Required

Drill

Phillips screwdriver

Tape measure

pencil

Level

Teflon Tape

Silicone

Installation Steps

1

- Red "H"
- Blue "C"

Hand tighten the hot and cold flexible water supply line onto faucet body.

2

Insert faucet body assembly onto the faucet tube from the top and hand tighten it. Make sure the flexible water supply lines go through the tube smoothly.

3

Insert the faucet tube into the base cover. Thread the tube onto the mounting tripod.

4

Locate the faucet assembly onto the rough valves from floor, and secure the connection of inlet supply lines to the valves.
DO NOT reverse the Hot and Cold supply.

5

Using the mounting piece as a template, mark the positions of the screw holes.

6

Use the explosive screw to fix the base on the floor and place the base cover over the valve.

7

Install hand shower and hose, check for any leak between hose connection and hand held shower

8

Finished.

Troubleshooting

If you have followed the instructions carefully and your faucet still does not work properly, take the following coorective steps:

PROBLEM	CAUSE	ACTION
Leakage under the handle	Bonnet nut has come loose	Remove the cover button.Loosen screw with hex wrench . Remove the handle. Unscrew cap (by hand only). Tighten bonnet nut with an adjustable wrench. Remove the cartridge. Check for cracks
Aerator drips or has inconsistent water flow pattern	Aerator is dirty or not seated properly	Unscrew aerator with a coin/ Housing/integrated thread and clean out debris
Water will not shut off completely	Cartridge may need tobe adjusted or replaced	Remove the cover button.Loosen screw with hex wrench. Remove the handle. Unscrew cap (by hand only). Tighten bonnet nut with an adjustable wrench. Remove the cartridge. Check for cracks
Lower flow	The filter washer in thehose connectors or Aerator is dirty	Turn off the water supply at water valve and unscrew the hose connectors from water supply lines. Clean the filter washer in the water lines with hot water, removing any debris or calcium build up.Take off the aerator and clean it with hot water.

Limited Lifetime Warranty

MAXTOR® provides our customers with an extensive warrant as a result of our excellent workmanship and high quality components used in our products.

Limited Lifetime Warranty: All parts of MAXTOR® faucet are warranted to the original consumer purchaser to be free from defects in material and workmanship for as long as the original consumer purchaser owns the home in which the faucet was first installed.

Surface finish warranty: A 5-years warranty is provided for all MAXTOR® faucet finishes to the original purchaser against manufacturing defects in workmanship.

Any labor charges incurred by the purchaser to repair, replace, install or remove this product are not covered by this warranty. MAXTOR Company shall not be liable for any damage to the faucet resulting from reasonable wear and tear, outdoor use, misuse (including use of the product for an unintended application), freezing water, abuse, neglect or improper or incorrectly performed installation, maintenance or repair, including failure to follow the applicable care and cleaning instructions.
